

CONTROL YOUR BUSINESS

WITH THE C SERIES MOBILE MIXER

LIGHTWEIGHT STEEL

Mixer made from Strenx advanced high strength steel to maximise payload.

EASE OF USE

Electronic control panel allows for the ability to start and stop pouring with one button.

ACCURATE

Most tested volumetric mixer in the history of the industry.

PROVEN

Three years of demonstrated performance. Field tested. Customer approved.

ACCUPOUR™

**3rd Generation C Series
With Enhanced Technology
Optimized For The UK**

TECHNOLOGY	The ACCU-POUR™ suite of solutions provide a complete view of your business operations. Blend the big picture together with everyday details and gain complete control over your business.
AUTOMATION	The driver can set gate controls, push one button and pour. The mixer has accountability to itself through advanced technology and engineering.
ELIMINATE RISK	Pre-programmed mix designs takes the need out of having concrete experts on staff. Information is stored electronically for each job and mix to continually improve productivity, profits, and lower costs.
SAFETY	A no-slip work platform, high illumination LED lights, and a wireless remote lets the operator work safely through their shift.

SPECS, FEATURES, AND OPTIONS

SPECIFICATIONS	CARRYING CAPACITY*	WATER TANK	CEMENT BIN	PRODUCTION RATE*
C60LW	7.5m ³	1930 L	2.8 m ³	46 m ³ /hr

STANDARD FEATURES

STRENX™ Steel	Optimized for a 32-ton weight limit, this mixer is made from Strenx advanced high strength steel to decrease weight and increase carrying capacity.
AP-Touch™	Cemen Tech's proprietary, advanced one-touch control system. Simply select the mix design you need and the system auto adjusts to the correct mix. Pre-load unlimited mix designs so you're always ready for any job.
Auto-Stow™	Easy to lower and raise chute. This additional safety measure means you're traveling with a safely secured chute.
Auto-Washout™	Quickly wash out on the job site to prevent material build up.
High & Low Flow Admix Tank with Digital Flow Meters	Operator control is simplified with automated admix tanks to ensure the exact amount of admixture is used every time.
Two-Speed Cement Bin	Adjustable cement discharge allows an operator to easily switch between concrete mixers and flowable fill applications.
Sand, Stone & Cement Bin Vibrators	Ensure materials are delivered at a consistent rate with pre-programmed, auto-adjustable vibrators.
Dual Auger Cement Metering	Take the guesswork out of pouring with consistent mix designs within +/- 1 percent every time.
Pump Master Auger with IBS Bearing	A homogeneous mixing auger in the industry for higher discharge height than standard dual mix section augers with an internal bearing system pre-loaded with oil for extended life.
Work Platform	Put safety first with a large work platform to ensure cement is properly and safely loaded.
360° Swivel	Swivel chute makes concrete finishing easier by changing the flow of concrete in any direction.

OPTIONAL FEATURES

Colour System	Need colour? No problem! A hopper provides the ability to introduce colour pigments into concrete for multiple applications.
Wireless Remote	Operators can move about the job site while maintaining control of the mixer.
ACCU-POUR Office/Mobile	Connect your mixers in the field with your dispatch centre. Make decisions with real-time data.
Ticket Printer	Generate a custom batch ticket for your customer.
Additional Admix Systems	Add another admix system for mix designs requiring more than two admixes per job.
Electronic Tarp	Secure aggregates during transit with a high-quality, UV resistant black mesh tarp.
Strobe Lights	Brighten up your work sites and create awareness for traffic around you with bright amber strobe lights.
Spray-In Bin Liner	Get extra protection and seal the inside of the aggregate bin with a heavy duty polyurea protective coating.
Automated Gates	Reduce operator error — aggregate gates self-adjust to the required height based on selected mix design.

*Measurements provided are approximations based on materials and mix designs.
